

TTS Instructions (Temperature Sensor)

Description: The TTS consist of a remote temperature probe and battery powered display providing a simple way to monitor temperature locally. The TTS is available in a 1U rack-mountable plate or portable housing. The included temperature sensor comes with 12' of cable.

Specifications

Power:	Two type AA batteries (customer supplied)
Battery Life:	More than one year (with high quality alkaline batteries), built in low battery warning.
Temp Range:	-40°F to 150°F, displayed in both °F and °C
Accuracy:	+/- 1°F

Installation Guidelines

- Install two type AA batteries. Portable unit requires removal of back plate.
- Connect remote temperature probe.
- Secure in desired location.

Note:

Touching the circuit board with bare hands may diminished battery life as the oils and salts from skin can lead to higher power consumption by the circuitry.
